EDUCATION

Pursuing Bachelor of Technology (B.Tech) in Computer Science Engineering

MIT academy of engineering | 2025 – 2029

- Relevant Coursework: Programming Fundamentals, Data Structures (Basic), Mathematics for Computing

PROJECTS

Linux Daily Timetable & Weather App

- Developed a Linux-based application to display daily timetable and real-time weather updates
- Implemented user-friendly interface and automated schedule notifications
- Gained experience in Linux development, scripting, and integrating APIs

AQI & Weather Prediction Website

- Built a responsive website to predict Air Quality Index (AQI) and weather conditions
- Integrated live data APIs for accurate, real-time information
- Applied HTML, CSS, and basic JavaScript to create interactive UI

Personal Portfolio Website (HTML, CSS)

- Designed a simple portfolio website to showcase projects and skills
- Learned fundamentals of web development, responsive design, and UI structuring

SKILLS

Technical Skills:

- Programming: Python, C, C++ (Beginner)
- Web Development: HTML, CSS (Basics)
- Tools: Git (Basic), VS Code
- Concepts: Data Structures (Basic), OOP (Intro)

Soft Skills:

- Problem Solving
- Logical Thinking
- Communication
- Time Management

CERTIFICATIONS

- Nascomm digital 101-30
- Anthropic Certification Claude Ai
- Basics of Python cisco certification
